SUMMARY

Junior Fullstack Developer capable of building modern web applications using Next.js 16, TypeScript, and PostgreSQL. Successfully architected and deployed complex systems, from role-based security dashboards to multi-branch inventory platforms. Experienced in leveraging AI-assisted workflows and modern UI libraries like Shadcn to accelerate development and deliver production-ready solutions deployed on Vercel.

WORK EXPERIENCE

Fullstack Web Developer

Nov 2025 - Present

Primex Ventures (Tarlac City)

- Maintain end-to-end architectures: Manage frontend interfaces and backend APIs using React technology stacks.
- Implement features: Translate business requirements into functional UI components and secure API integrations.
- Optimize performance: Refactor legacy code to improve site speed and cross-browser compatibility.
- Ensure stability: Utilize debugging tools to identify logic errors and enhance application reliability.

IT Intern / System Developer

Feb 2025 - Jun 2025

Eastwest BPO Company

- Deploy security systems: Launched a custom RFID system on Windows Server with managed user roles.
- Integrate hardware: Connected physical scanners to web-based logging and resolved connectivity conflicts.
- Manage databases: Administered MySQL schemas to ensure data integrity and query optimization.
- Facilitate turnover: Created technical documentation and trained staff on system usage.

EDUCATION

2021 - 2025

Bachelor of Science in Information Technology

Our Lady of Fatima University

SKILLS

Frontend Development: Next.js (App Router), React, TypeScript, Tailwind CSS, Shadcn UI, Responsive Design.

Backend & Database: Supabase (PostgreSQL), Node.js, Next.js Server Actions, MySQL (phpMyAdmin).

System & Tools: Git/GitHub, Vercel Deployment, VS Code, Postman, Authentication (NextAuth/Custom).

Networking: CCNAV7 Certified, Linux CLI, Windows Server Administration.

PERSONAL PROJECTS

VapeTrack PH (Sales & Inventory Management System)

Jul 2024 - Current

- Tech Stack: Next.js 16, TypeScript, Supabase (PostgreSQL), Tailwind CSS, Shadcn
- Multi-Branch Management: Developed a scalable inventory system supporting multiple store locations with real-time stock tracking.
- Dual Authentication: Engineered a secure login system featuring 4-digit PIN access for staff and Email/Password credentials for owners.
- Analytics Dashboard: Built an interactive Owner Dashboard displaying revenue analytics, top products, and recent activity using trend charts.
- Production Deployment: Deployed the full-stack application on Vercel with a connected Supabase database for live production use.

DevFinder — Developer Portfolio Aggregator

- Built a platform to showcase developers' projects and GitHub stats dynamically.
- Used React (Vite), GitHub API, and optimized performance for smooth user experience.

CERTIFICATES

CCNAv7: Introduction to Networks

March 2024

Cisco Networking Academy

- Gained foundational knowledge of network architecture, TCP/IP protocols, and IP addressing schemes to support secure network communications.

NDG Linux Essentials

May 2023

Cisco Networking Academy

- Acquired proficiency in the Linux Command Line Interface (CLI), file system navigation, and user permission management essential for server administration.

Networking Devices and Initial Configuration

Nov 2024

Cisco Networking Academy

- Developed practical skills in configuring Cisco routers and switches, managing device security settings, and verifying network connectivity.

Networking Basics

Nov 2024

Cisco Networking Academy

- Covered the fundamentals of network communication, media types, and troubleshooting methodologies for common connectivity issues in local area networks.

The Complete Full-Stack Web Development Bootcamp

July 2025

Udemy - Angela Yu

- Comprehensive training in the web development lifecycle (Frontend, Backend, Databases), providing a strong understanding of client-server architecture to assist in troubleshooting web application issues.
